BIOMEDICAL SCIENCES (BIOMED SCI)

BIOMED SCI 116 Structure of Cells, Tissues, and Organs (8 Units) Fall
Instructor(s): Michael T. McMaster
Prerequisite(s): none
Restrictions: D1
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

With a patient population that is increasingly medically complex, today's dentist must have a sound understanding of the structure and function of the body. In this course, students will be introduced to human gross anatomy and histology, as well as concepts in general pathology. This provides the foundation for increasingly complex coverage of structure/function relationships that underlie health and disease, with emphasis on those that impact dental care.

School: Dentistry
Department: Cell And Tissue Biology
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

BIOMED SCI 117 Infection and Host Response; Cell Physiology (8 Units) Winter
Instructor(s): Elizabeth A Joyce, Zachary A. Knight
Prerequisite(s): none
Restrictions: D1
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course will provide a foundation in the microbiologic, immunologic, and pharmacologic therapies used to treat and prevent infectious diseases, which rank among the leading causes of morbidity and mortality world-wide. Additionally, to better understand how medications like local anesthetics work, this course will provide a foundation in membrane structure, membrane transport, signaling, neurophysiology, and local anesthetics. This latter material will dovetail with the subsequent courses.

School: Dentistry
Department: Cell And Tissue Biology
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

BIOMED SCI 118 Organ Systems and Human Pathophysiology I (9 Units) Spring
Instructor(s): Michael T. McMaster
Prerequisite(s): Successful completion of Biomed 117 or consent of instructor.
Restrictions: D1
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Patients are living longer with complex medical issues making it more important than ever for dentists to understand the most common conditions that can impact the safe delivery of dental care. In this course students will learn about the normal function and diseases of the respiratory, renal, cardiovascular and nervous systems as well as the common therapies used to treat conditions affecting them.

BIOMED SCI 126  Organ Systems and Human Pathophysiology II (5 Units)  Fall  
*Instructor(s):* Michael T. McMaster  
Prerequisite(s): none

Restrictions: D2

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

A contemporary dentist has a solid understanding of medical conditions that will impact the safe delivery of their care. In this course, students will learn about the gastrointestinal, endocrine, and hematologic systems.

School: Dentistry  
Department: Cell And Tissue Biology

May the student choose the instructor for this course? No  
Does enrollment in this course require instructor approval? No  
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

Graduate Division course: No  
Is this a web-based online course? No  
Is this an Interprofessional Education (IPE) course? No  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

BIOMED SCI 127  Oral Pathology (2 Units)  Winter  
*Instructor(s):* Richard C Jordan, Kyle B Jones  
Prerequisite(s): none

Restrictions: D2 and ID3 students

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This course is a clinically focused didactic course that will cover most soft tissue and bone diseases that may be seen in dental patients. Familiarity with etiology, clinical appearances, and treatment of oral mucosal conditions will be important in advising and managing your patients. Included are primary oral diseases and oral manifestations of systemic diseases, which can range from trivial to life threatening.

School: Dentistry  
Department: Orofacial Sciences

May the student choose the instructor for this course? No  
Does enrollment in this course require instructor approval? No  
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

Graduate Division course: No  
Is this a web-based online course? No  
Is this an Interprofessional Education (IPE) course? No  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

BIOMED SCI 186  Advanced Dissection in Head and Neck Anatomy (1 Units)  Fall, Winter, Spring, Summer  
*Instructor(s):* Barbie A Klein, Michael T. McMaster  
Prerequisite(s): Successful completion of BMS 116, 117, and 118.

Restrictions: Enrollment requires permission of instructor and is limited to the DDS students in 2nd, 3rd and 4th years.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This advanced elective allows students to review, refine, and consolidate their knowledge of gross anatomy through cadaveric dissection and literature review of clinical applications related to the area. Each student, in consultation with an instructor, will determine a dissection area (or areas) of interest and develop an individual plan of study. Assessments include a formal presentation of the final prosection and creation of a teaching and learning resource related to the area.

Does enrollment in this course require instructor approval? Yes  
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

Graduate Division course: No  
Is this a web-based online course? Yes  
Is this an Interprofessional Education (IPE) course? Yes  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

BIOMED SCI 187  Laboratory Instruction in Gross Anatomy (1.5 Units)  Fall  
*Instructor(s):* Michael T. McMaster  
Prerequisite(s): Successful completion of BMS 116, 117, and 118.

Restrictions: Enrollment requires permission of instructor.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course provides advanced training for dental students interested in anatomical sciences. Upper-class students will serve as teaching assistants for 1st year dental students in virtual gross anatomy laboratory sessions. It provides reinforcement of anatomic knowledge covered in the 1st year of dental education in preparation for National Board exams. Students also gain experience instructional methods and the opportunity to explore careers in academic dentistry with a teaching component.

Is this an Interprofessional Education (IPE) course? Yes  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
BIOMED SCI 198  Supervised Study (1-5 Units) Fall, Winter, Spring
Instructor(s): Tien Peng, Bruce M Wang
Prerequisite(s): None

Restrictions: None.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects
Library research and directed reading under supervision of a member of the faculty.

School: Graduate Division
Department: Biomedical Sciences Program

May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/ Unsatisfactory)
Graduate Division course: Yes
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes
Repeat course for credit? Yes

BIOMED SCI 215  Laboratory Rotation (1-8 Units) Fall, Winter, Spring, Summer
Instructor(s): Staff
Prerequisite(s): None.

Restrictions: None.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects
Research experience in the laboratory of Biomedical Sciences faculty members.

School: Graduate Division
Department: Biomedical Sciences Program

May the student choose the instructor for this course? Yes
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/ Unsatisfactory)
Graduate Division course: Yes
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes
Repeat course for credit? Yes

BIOMED SCI 221  Seminars in Biomedical Sciences (1 Units) Fall, Winter, Spring
Instructor(s): Mark Ansel
Prerequisite(s): none

Restrictions: none
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion
Seminar: Weekly seminar series held at Parnassus and livestreamed to the UCSF community, or held virtually via Zoom in some cases. Seminar speakers chosen by a BMS faculty committee after soliciting suggestions from all BMS faculty and students. Seminar topics will include recent experimental findings in human biology and disease.

Repeat course for credit? Yes

BIOMED SCI 225A  Investigating Human Biology and Disease (2.5 Units) Fall
Instructor(s): Scott C. Kogan, Aaron D Tward
Prerequisite(s): None.

Restrictions: Admission to UCSF Graduate Program or permission of instructor.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion
This course aims to provide students with practical knowledge and experience in approaches and methods used in biomedical research. -Biostatistics & computational biology. Introduction to Unix/Python/R. Study designs, hypothesis testing, biostatistical & reproducibility analysis. -Practical selectives. Intended to provide a foundation for graduate students in methods used to understand human cells, tissues, & organs, and to illustrate how these methods illuminate physiology and pathobiology.

BIOMED SCI 225B  Investigating Human Biology and Disease (3 Units) Winter  
_Instructor(s):_ Saul A Villeda  
Prerequisite(s): None.

Restrictions: Admission to UCSF Graduate Program or permission of instructor.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

An integrative course emphasizing frontiers in cell and molecular biology of human tissue and organ systems. It is intended to provide a foundation in human anatomy, histology, immunology, physiology and pathobiology for graduate students. Rather than a comprehensive course, selected topics will be discussed in depth. The emphasis may shift each year, depending on which topics are relevant and timely.

BIOMED SCI 230  Advanced Topics in Cancer Research (0.5 Units) Fall  
_Instructor(s):_ Trever G Bivona  
Prerequisite(s): None.

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Lectures will guide understanding of the epidemiologic, molecular genetic, cell and pathobiological aspects of cancer focusing on 1) regulatory and effector mechanisms, 2) the cells constituting tumor microenvironments, and 3) relationships between basic biomedical research and their clinical applications. In Advanced Topics, students will present literature reports based on Lecture content supported by a Faculty Discussion leader who will pose an interesting/controversial spin on the topic.

BIOMED SCI 250  Research (1-8 Units) Fall, Winter, Spring, Summer  
_Instructor(s):_ Staff  
Prerequisite(s): Completion of prior laboratory rotations.

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Dissertation research in a Biomedical Sciences Program approved laboratory.

School: Graduate Division

BIOMED SCI 255  Basic Genetics & Genomics (4 Units) Winter  
_Instructor(s):_ Christian Vaisse, Anita Sil  
Prerequisite(s): None.

Restrictions: Students who are not in a UCSF graduate program must get permission from the instructor to take the course.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The scope of this graduate level course in genetics is to convey an understanding of basic genomics and molecular genetics, of the use of genetic animal model systems and of the analytical principles of simple and complex human genetic traits.

BIOMED SCI 260  Cell Biology  (4 Units)  Fall  
**Instructor(s):** Jeroen P. Roose, Bassem Al-Sady  
**Prerequisite(s):** no  
Restrictions: Enrollment limited to students in the BMS, DSCB, OCS and MSTP programs. Other students may enroll only with consent of course directors.  
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects  
The scope of this course is to convey an understanding of the function and organization of molecules and organelles inside and outside the cell and how these are used to construct a multicellular tissue and organ. The course will concentrate on questions related to how cells function, including how they grow, divide and die, and how they move, secrete and communicate.

BIOMED SCI 300  Methods in Teaching Human Biology and Disease  (1 Units)  Fall, Winter, Spring  
**Instructor(s):** Staff  
**Prerequisite(s):** None  
Restrictions: None  
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects  
Lecture/discussion: Practical experience in the methods and problems of teaching human biology and disease. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor.
