FAMILY AND COMMUNITY MEDICINE (FAM CM MED)

FAM CM MED 110  FCM Core Clerkship  (2-9 Units)  Fall, Winter, Spring, Summer
Instructor(s): Erica C Brode, Betsy P Wan
Prerequisite(s): Successful completion of a pre-core clerkship medical student curriculum (Essential Core, Foundations 1 or Joint Medical Program)

Restrictions: Medical student

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

A required core clerkship in Family Medicine where students learn to provide primary care in an outpatient setting. Under supervision and with instruction, students perform ambulatory visits for chronic care, acute care and preventive care.

School: Medicine
Department: Family And Community Medicine

May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory), In Progress (IP, SP/UP) grading allowed
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes

FAM CM MED 130.01  CIEx - Outpatient Family Medicine Apprenticeship  (3 Units)  Fall, Winter, Spring, Summer
Instructor(s): Margo H. Vener
Prerequisite(s): • Students must have completed at least 4 sessions of FCM 110 and either OB/Gyn 110 or Med 110 clerkship. • Students must have a strong interest in primary care.

Restrictions: Medical Students in Foundations 2

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This is a Bridges Curriculum Clinical Immersive Experience (CIEx), which provide medical students in Foundations 2 opportunities to broaden and enhance their professional development in health care settings different from those of their core clerkships. San Francisco Free Clinic provides free primary care and urgent care for uninsured individuals in San Francisco. Students will work with family physicians and general internists to provide ambulatory care to primarily adult patients.

**FAM CM MED 140.40 Advanced Inpatient Clerkship (6 Units)  Fall, Winter, Spring, Summer**  
*Instructor(s):* Margaret P. Stafford  
*Prerequisite(s):* Medicine 110. For students who have done a longitudinal third-year curriculum (e.g. PISCES, KLIC), we strongly recommend completing an inpatient consult month (1B) before starting FCM 140.40. If you have specific questions about your level of preparation for this rotation, please contact Dr Margo Vener.  

Restrictions: To enroll in this course, you must also have contacted Dr Vener and let her know that you are considering Family Medicine residency.  

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects  

The Family Medicine Inpatient Service at SFGH employs a family medicine approach to the care of hospitalized adult patients with diverse medical problems. Students function as members of the multidisciplinary inpatient team at a junior intern level. Students review their patients with the attending daily. Teaching rounds are held daily and include weekly behavioral science and radiology rounds in addition to interactive small group teaching on core inpatient medicine topics.

FAM CM MED 170.02  Patient Interview Approaches to Communication and Engagement  (1 Units)  Fall, Winter, Spring
Instructor(s): Margo H. Vener, Shieva Khayambashi, Lawrence N Hill
Prerequisite(s): None

Restrictions: First or second year students in the schools of medicine or nursing.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

Students will review key topics in advanced patient interviewing to improve communication, engagement, and patient education skills during patient interviews. Students will interview patients at the bedside or in clinic while some classmates and instructors observe and provide feedback, suggestions and reinforcement of key points. Effective strategies for building trust, empathic listening, motivational interviewing and finding meaning in the shared provider patient relationship are explored.

FAM CM MED 170.18 Caring for the Underserved (1 Units) Fall, Winter
Instructor(s): Monica U Hahn
Prerequisite(s): None

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course is intended to raise awareness around important topics and issues concerning the care of underserved populations from an interdisciplinary perspective. Lecture topics focus on the principles, practices and populations of underserved care. Lecturers reflect a diversity of health professions ranging from social workers, physicians, pharmacists, nurses, and other community leaders that work with underserved communities.

FAM CM MED 170.20 Engaging Communities in Health Outcomes (ECHO) (1 Units) Fall, Winter, Spring, Summer
Instructor(s): Manuel A Tapia
Prerequisite(s): Only professional students

Restrictions: MD students

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course is focused on professional development skills-building in which medical students work directly with Family Resource Centers (FRCs) across San Francisco. This course focuses on community engagement/development as students will make recurrent site visits to the FRCs. During this course, students will co-facilitate at least two Health Coaching sessions, and strategize with colleagues and FRC community partners on how to develop curricular improvements for the following academic year.

FAM CM MED 171.04 Integrative Medicine Forum (0.5 Units) Winter, Spring
Instructor(s): Shelley R. Adler
Prerequisite(s): None.

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The Integrative Medicine Forum is a multidisciplinary community conference for current and future leaders in all areas of healthcare, including medicine, nursing, dentistry, and pharmacy. Through keynote addresses, panel discussions, and interactive workshops, attendees will examine key issues in complementary and integrative medicine. Focus areas included how integrative medicine can address practice gaps in clinical care and an in-depth review of current research in the field.

**FAM CM MED 171.05 Longitudinal Primary Care Elective (1 Units) Winter, Spring**

_instructor(s):_ Margo H. Vener, Sarah E Galewyrick

Prerequisite(s): None

Restrictions: 1st year medical students only

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The Longitudinal Primary Care Elective is an experience in which first year medical students learn about the importance of primary care and continuity relationships. Students discuss the role of primary care and focus on key issues in preventive care. Using primary care cases, students practice essential elements of a primary care visit including: patient interviewing techniques, the hypothesis-driven physical exam, outpatient procedures, closing the loop, patient education and counseling.

**FAM CM MED 171.06 Forensic Evaluation and Education of Asylum Seekers (1 Units) Fall**

_instructor(s):_ Coleen H Kivlahan, Triveni B Defries

Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The course will empower students to both understand and act to alleviate the health challenges faced by displaced populations. Students will learn to conduct forensic medical and psychiatric evaluations of asylum seekers in the U.S. Students will apply skills learned during the elective by taking part in medical and psychiatric asylee evaluations in the clinic. The course will additionally host speakers who are leaders in refugee health and connect students with research opportunities.

**FAM CM MED 171.07 Introduction to Harm Reduction and Addiction Medicine (1 Units) Fall**

_instructor(s):_ Daniel H Ciccarone

Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This elective explores the principles of harm reduction and the health care and structural challenges among people living with substance use disorders. Our speakers include community stakeholders in the harm reduction movement, health professionals and researchers. Our goal is to help dismantle stigma around drug use and help students recognize substance use disorders as a pressing primary care and public health issue that can be addressed using evidenced-based interventions.
