GLOBAL HEALTH SCIENCES (GLOBL HLTH)

GLOBL HLTH 101X Introduction to Global Health (1.5 Units) Fall, Winter, Spring, Summer
Instructor(s): Christopher C Stewart, Michael S Lipnick, Mylo Schaaf
Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The Introduction to Global Health online course will cover major global health problems, the actions and approaches to addressing them. This is an entirely online version of GLOBL HLTH 101. Students will engage in a series of online modules including videos, assessments, and activities. There will be the opportunity to explore global health careers. This is an elective course, but is a prerequisite for those planning to do the global health clinical scholars course (GH 103)

School: Medicine
Department: Medicine
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? Yes
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes

GLOBL HLTH 103 Global Health Pathway Clinical Scholars Course (3.5 Units) Fall
Instructor(s): Michael S Lipnick, Sohil R Sud
Prerequisite(s): Enrollment is restricted to students in any UCSF professional school, residents, and fellows, who apply and are accepted into the Global Health Course, or who obtain the consent of the Instructor.

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This course will survey key topics, concepts and vocabulary of global health practice and focus on the development and background work necessary to complete a scholarly project for the global health pathway. Students will study major global health challenges, strategies for responding to them, and key global health institutions. They will develop skills in project management and leadership for their future global health careers.

Is this an Interprofessional Education (IPE) course? Yes
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes
**GLOBL HLTH 201A Foundations of Global Health (3 Units) Fall**  
*Instructor(s): George W Rutherford*  
*Prerequisite(s): None*  

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course introduces the principles of global health by examining different health systems and health metrics with particular emphasis on low and middle income countries. Content will cover demographics, population growth, maternal and child health, migrant health, health effects of climate and environment, poverty and health equity, health governance and key institutions, research, development and philanthropy.

**School:** Global Health

**GLOBL HLTH 201B Global Health Economics (3 Units) Spring**  
*Instructor(s): Justin S White*  
*Prerequisite(s): None*  

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Wide survey of issues and concepts in global health economics, including costing, economic & disease metrics, the relationship of health and wealth, the U.S. health system and reform, the role of the private sector, financial flows in health assistance, cost-effectiveness analysis, resource allocation (incl. ethics), and workforce. Classes combine lecture and participatory seminars (with presentations and debates). Each student develops a systematic review or research protocol as a term paper.

GLOBL HLTH 201C Qualitative Research Approaches in Global Health (3 Units) Fall

Instructor(s): Wayne T Steward
Prerequisite(s): None

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course places a particularly strong emphasis on developing skills for conducting qualitative interviews, which are a frequently used technique for answering social and behavioral research questions. It addresses the following questions: What methods can health professionals use to understand the socio-political-cultural environments where they work? Which methods are most appropriate for which research questions? How are qualitative research methods implemented?

School: Global Health
Department: Global Health Sciences

GLOBL HLTH 202A Communicable Diseases of Global Health (3 Units) Winter

Instructor(s): Vivek Jain, Christina Yoon
Prerequisite(s): None

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course covers global communicable diseases, including the biology, history, epidemiology, and economics of key infections. We will focus on HIV infection, malaria, tuberculosis, and other communicable diseases of international importance. Through lectures, seminars, and independent study, students will learn about the basic principles of infection and immunity, disease epidemiology and pathogenesis, and varied aspects of the treatment and control of leading infections.

GLOBL HLTH 202B Health, the Environment and Non-communicable Disease (3 Units) Spring

Instructor(s): Dean Schillinger
Prerequisite(s): None

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course covers chronic diseases of global health importance such as cardiovascular illnesses, the emergence of diabetes, cancer, and respiratory disease as well as their risk factors. In addition, the course will emphasize the effects of climate change and environmental exposures. Other topics will include injuries, surgical interventions, humanitarian emergencies, and mental health. Students will learn about policy options and interventions to prevent and manage chronic illnesses.

GLOBL HLTH 202D Social Determinants of Health (3 Units) Fall

Instructor(s): Madhavi Dandu
Prerequisite(s): None

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course describes cultural, social and economic issues, and the multiple methods of global health research to provide essential background for other core courses. Drawing on anthropology, sociology, public health, global health, and critical global health studies, the course examines factors (e.g. globalization, the impact of social, economic, and political systems, transnational organizations, culture, race, class, gender, sexuality, disability) that create and sustain disparities.

GLOBL HLTH 202F Strategic Information in Global Health (2 Units) Winter
Instructor(s): Ali Mirzazadeh, George W Rutherford
Prerequisite(s): None

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course will cover the following topics: use of surveillance and programmatic data for estimating burden of disease and trends in disease; sampling and estimating size of hard-to-reach populations (e.g., respondent-driven sampling, time-location sampling, capture-recapture); data synthesis and triangulation; monitoring and evaluation.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This goal of this year-long course is to cultivate all of the skills necessary to develop and complete a capstone proposal. At the end of this course, students will be proficient in: 1) Scientific Writing, 2) Team-based Learning, 3) Presentation Skills, and 4) Ethics, and 5) Scientific Process. The skills built to complete a successful capstone project will be applicable to future global health career paths.

**GLOBL HLTH 204B  Global Health Capstone (3 Units) Summer**

*Instructor(s): Madhavi Dandu*

*Prerequisite(s): None*

Restrictions: Enrollment in Global Health Sciences Masters Degree Program, unless expressly given permission by the course director and MS Program Director. Due to a special agreement with the Masters in Translational Medicine and the Biomedical Engineering Programs, those students will be given priority for any additional spaces in selected courses. However, approval by course director and both program directors required.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The Capstone project provides a rich opportunity to explore an interest area in considerable depth. You are required to develop a longitudinal project, starting in the fall quarter, culminating in a final written and oral presentation at the end of summer quarter. Students will work closely with the Practice Seminar (GHS 203) course faculty to develop an appropriate project based on interest, skills and an available field site where UCSF has an ongoing project.

**GLOBL HLTH 205  Global Health Policy (3 Units) Winter**

*Instructor(s): Laura A Schmidt*

*Prerequisite(s): Successful completion of GHS 201A, 201B, 202A, 202B, 203A, and 203B.*

Restrictions: Enrollment in MS in Global Health, unless expressly given permission by the course director and MS Program Director. Masters in Translational Medicine and Biomedical Engineering students will be given priority for any additional spaces. Approval by course director and both program directors is required. GHS program dates differ from the UCSF Academic Calendar. Refer to the GHS MS calendar at http://globalhealthsciences.ucsf.edu/education/masters-program/about-program/academic-calendar

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course will introduce policy and development in the context of global health. Students will examine the structure and function of evidence-based policy planning and implementation using selected case studies. Learning the skills of assessment, monitoring, and evaluation, students will examine global health development interventions ranging from disease control to eradication to health promotion. Use of guest lecturers will acquaint the students with field experiences and practical outcomes.

Instructor(s): Madhavi Dandu, Elizabeth Fair
Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course will provide students with an introduction to Monitoring & Evaluation (M&E) in global health settings and to expose students to the role and use of M&E for planning and improvement of health systems. The course will provide students with basic approaches for health in M&E, identifying key stakeholders, and data collection used in health systems. The course also provides students with interpretation, communication and computer skills needed to succeed as an M&E specialist.

May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes

GLOBL HLTH 217 Doctoral Seminar (2 Units) Fall, Winter, Spring
Instructor(s): Elizabeth Fair, Ali Mirzazadeh
Prerequisite(s): None.

Restrictions: This seminar is only offered to PhD in Global Health Sciences students.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The global health doctoral seminar is designed to educate students about interdisciplinary approaches to global health challenges, provide professional development and career training/mentorship in global health research, and enable students to advance their academic and research skills, with the ultimate goal of facilitating the development of the doctoral student’s capacity to conduct research in global health.

School: Global Health
Department: Global Health Sciences
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes
Repeat course for credit? Yes
GLOBL HLTH 248  Teaching Residency (1-2 Units)  Fall, Winter, Spring

Instructor(s): Staff  
Prerequisite(s): Consent of Instructor

Restrictions: Enrollment in Global Health Sciences PhD Program.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The purpose of the teaching residency is to allow students to increase their knowledge in an area of interest, to present and explain the material to others in an effective manner, and to build their base of teaching experience in preparation for future academic positions.

GLOBL HLTH 249  Research Rotation (2 Units)  Fall, Winter, Spring, Summer

Instructor(s): Staff  
Prerequisite(s): Completion of first quarter of doctoral study and consent of adviser.

Restrictions: Enrollment in Global Health Sciences PhD Program.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The student will participate in ongoing faculty research. This experience will contribute to the students methodological or substantive expertise. Research Rotations provide extensive specialized experiential training with a specific deliverable (e.g. survey instrument, statistical plan, manuscript). During the Research Rotation the student is apprenticed under a specific member of the research team (the Rotation Director), who manages and is responsible for the experience.

GLOBL HLTH 250  Research (1-8 Units)  Fall, Winter, Spring, Summer

Instructor(s): Staff  
Prerequisite(s): Completion of Global Health Sciences PhD core curriculum coursework

Restrictions: Enrollment in Global Health Sciences PhD program

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This course allows PhD students who are involved with Global Health research to obtain credit for their research.

GLOBL HLTH 251  Global Health Development and Inequity (2 Units)  Fall

Instructor(s): George W Rutherford  
Prerequisite(s): None

Restrictions: First year PhD in Global Health Sciences students or consent of instructor.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course serves as a foundation for doctoral level studies in global health. It assumes a basic familiarity with the fundamental principles and concepts in global health. Students will study the social and environmental factors affecting health, major global health challenges, and the role of national, multilateral and non-governmental actors. The course will also serve to introduce the students to the UCSF global health community, both within and beyond GHS.

GLOBL HLTH 252  Comparative Health Systems and Financing (2 Units) Winter
Instructor(s): Dominic D. Montagu
Prerequisite(s): None

Restrictions: Priority given to students enrolled in the PhD in Global Health Sciences program. Open to students in other programs with consent of instructor.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course examines the most important models for financing and delivering health care around the world. Students will be taught to map and analyze the health systems of countries at various income levels, and to assess the strengths and weaknesses of these systems in achieving health goals. Students will learn about current debates about health systems, health financing, and Universal Health Coverage (UHC). Innovative models of health services delivery and financing will be presented.

GLOBL HLTH 253  Global Health Policy (2 Units) Winter
Instructor(s): Laura A Schmidt
Prerequisite(s): Students are encouraged to review the more basic curriculum of the Masters program and to particularly take advantage of materials housed on the website of GHS 205, Global Health Policy.

Restrictions: Priority given to students enrolled in the PhD in Global Health Sciences program. Open to students in other programs with consent of instructor.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course is an intensive exploration of theories of the global health policymaking process. It provides an advanced, high-level perspective on stages of the policy process, from agenda-setting, to policy development, to implementation. Course materials include foundational readings in policy literature and contemporary accounts. Discussions are tailored to address the substantive cases that will preoccupy students during their qualifying exams and dissertation research.

GLOBL HLTH 254 Research Ethics and Practice in Global Health (2 Units) Spring
Instructor(s): Nadia G Diamond-Smith
Prerequisite(s): None

Restrictions: Priority given to students enrolled in the PhD in Global Health Sciences program. Open to students in other programs with consent of instructor.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This pro-seminar will consist of 10 seminars based on discussions of research ethics and their application to the realities of conducting research in the field. We will bring in guests with expertise in ethics and research application, and engage in lively discussion and case studies. Students will be challenged to develop their own cultural framework and consider how they might engage in more ethically focused research and address potential ethical quandaries in their future research.

GLOBL HLTH 256 Global Health Architecture and Diplomacy (2 Units) Spring
Instructor(s): Jaime Sepulveda, Eric P Goosby
Prerequisite(s): This course is designed for doctoral level students who want to expand their knowledge of Global Health architecture and diplomacy. Students will be expected to have general knowledge about Global Health, including its main players and stakeholders as well as to keep up with the corresponding readings and assignments for each lecture and seminar.

Restrictions: Priority given to students enrolled in the PhD in Global Health Sciences program. Open to students in other programs with consent of instructor.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This doctoral seminar reviews the current health worldwide system—from UN agencies and governmental agencies to multilaterals, NGO’s and civil society. It also examines how health has been historically a powerful diplomatic tool. The course will be taught by global leaders of each topic through a combination of lecture, seminars and independent readings and study.

GLOBL HLTH 294 Independent Study (1-6 Units) Fall, Winter, Spring, Summer
Instructor(s): Staff
Prerequisite(s): None.

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This independent study course will involve in-depth study in a chosen field of global health importance that will result in a grant submission, publication or research paper. The student will submit an outline of goals and objectives that must be approved by the Program Director and the Faculty Advisor.
