## INTERDEPARTMENTAL STUDIES (INTERDEPT)

### INTERDEPT 113A  Foundational Sciences in Foundations 2 (Winter) (1.5 Units) Winter

**Instructor(s):** Heidi E. Kirsch  
**Prerequisite(s):** None

**Restrictions:** Medical students in Foundations 2  
**Activities:** Lecture, Seminar, Independent Study

This SOM Bridges Curriculum course brings students together every other week during the year-long Foundations phase to reinforce and advance their understanding of foundational science and develop health care testing knowledge. Students step out of concurrent clinical rotations to participate in this course. FS-in-F2 day components are: Family & Community Medicine seminar, foundations of high-value healthcare and Foundational Sciences curriculum.

**School:** Medicine  
**Department:** Neurology

### INTERDEPT 113B  Foundational Sciences in Foundations 2 (Spring) (1.5 Units) Spring

**Instructor(s):** Heidi E. Kirsch, Marta Margeta, Raga Ramachandran  
**Prerequisite(s):** None

**Restrictions:** Third year medical students in Foundations 2  
**Activities:** Lecture, Seminar, Independent Study

This SOM Bridges Curriculum course brings students together during Foundations 2 to advance their understanding of foundational science and develop healthcare testing knowledge. Students step out of concurrent clinical rotations to participate in this course. Learning methods will vary by session topic, including but not limited to presentations, problem-based learning and simulation. IDS 113B components are Appropriate Use of Diagnostic Tests and Foundational Sciences in Foundations 2.

INTERDEPT 115  Coda (3 Units) Spring  
Instructor(s): Bradley J Monash  
Prerequisite(s): 4th year standing in medical school.

Restrictions: 4th year standing in medical school.  
Activities: Lecture, Seminar, Independent Study, Workshop, Lab skills  
This course is intended to serve as a springboard from medical school to internship. The approach to common clinical, ethical, and social situations encountered during internship will be covered through a combination of lectures, seminars, small groups, team teaching and hands-on skills sessions.

INTERDEPT 116  Transitional Ambulatory Clerkship Experience (3 Units) Fall, Winter, Spring, Summer  
Instructor(s): Katherine L Lupton  
Prerequisite(s): None  
Restrictions: Medical Students in Foundations 2  
This course provides students a longitudinal ambulatory clinical experience in conjunction with their core clerkships. Students will consolidate existing ambulatory practice skills and develop additional proficiency in outpatient care in a specialty area of interest. Students step out of concurrent clinical rotations to participate in this course one full day per week.

School: Medicine  
Department: Medicine

INTERDEPT 117A  ARCH Week 5 (1.5 Units) Spring  
Instructor(s): Cathy Hoerth, Era Kryzhanovskaya  
Prerequisite(s): Foundations 1 courses or equivalent  
Restrictions: Medical Students in Foundations 2  
Activities: Lecture, Seminar, Web work, Workshop  
This SOM Bridges Curriculum series is a sequence of one week courses taught in intervals throughout Foundations 2 and Career Launch. Students participate in formative and summative assessments, holistically review performance data, reflect on professional identity formation, meet with Coaches to develop learning plans, and engage in wellness activities with peers.

INTERDEPT 117B ARCH Week 6 (1.5 Units) Summer  
*Instructor(s):* Cathy Hoerth, Era Kryzhanovskaya  
*Prerequisite(s):* None  

Restrictions: Medical Students in Foundations 2 and Career Launch  
Activities: Lecture, Seminar, Clinical, Web work  

This SOM Bridges Curriculum series is a sequence of one week courses taught in intervals throughout Foundations 2 and Career Launch. Students participate in formative and summative assessments, review performance data, holistically reflect on professional identity formation, meet with Coaches to develop learning plans, and engage in wellness activities with peers. Sessions are designed to address students’ learning needs at this point in the curriculum.

INTERDEPT 118 Deep Explore (1-16 Units) Fall, Winter, Spring, Summer  
*Instructor(s):* Rita F Redberg, Christopher C Stewart, Peter V. Chin-Hong  
*Prerequisite(s):* Designing Clinical Research (New course; Course approval form in progress at present).  

Restrictions: Career Launch students who have completed a thesis at UCSF and OMFS students will not be required to take Deep Explore  
Activities: Project  

This will be a mentored experience in research or scholarship for students in Career Launch. It will be required of students who have not completed a thesis (e.g. Masters, PhD) while at UCSF. A wide range of research topics is expected. The Deep Explore months may be split among multiple quarters with every student making an individual schedule and multiple sites, including off-campus sites, will be utilized.  

**School:** Medicine

**INTERDEPT 119 Introduction to Career Launch (3 Units) Winter**

*Instructor(s):* Bradley J Monash, Patricia A Cornett  
*Prerequisite(s):* None

**Restrictions:** Medical students in Career Launch  
**Activities:** Lecture, Seminar, Independent Study

This course will provide students an introduction to the clinical curricular components of Career Launch and important clinical curriculum in support of their advanced rotations and their further development towards physicianship. Students will participate in a mixture of didactic and small group learning activities, which will address healthcare needs in all clinical settings (home, ambulatory, inpatient, intermediate/longterm care) as appropriate.

**School:** Medicine  
**Department:** Medicine

**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

**Graduate Division course:** No

**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** No  
**Repeat course for credit?** No

**INTERDEPT 120 Designing and Conducting Research (2 Units) Winter**

*Instructor(s):* Rebecca E Graff, Meyeon Park  
*Prerequisite(s):* Foundations EBPS Core Inquiry Curriculum IDS121A

**Restrictions:** None

**Activities:** Lecture, Seminar

Designing and Conducting Research (DCR) is an introduction to the process of conceiving and conducting scholarly projects. Students will be exposed to overarching concepts and essential vocabulary for interpreting and executing scholarly work. Weekly coursework will culminate in the creation of a proposal for the Deep Explore project.

**School:** Medicine  
**Department:** Epidemiology And Biostatistics

**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** No

**INTERDEPT 121A Foundations 1 (9 Units) Fall**

*Instructor(s):* Marieke Krüdiering  
*Prerequisite(s):* None

**Restrictions:** None

**Activities:** Lecture, Laboratory, Clinical, Independent Study, Web work, Conference

This Bridges Curriculum course includes the emerging science of health systems and enduring sciences of structural & microscopic anatomy, cell biology, immunology, genetics, pharmacology, & pathology. It has a clinical microsystem clerkship experience and initiates the Core Inquiry Curriculum, introducing critical analysis of medical science advances. It ends with an ARCH (Assessment, Reflection, Coaching, Health) week, containing structured review of professional & competency development.

**School:** Medicine  
**Department:** Cellular And Molecular Pharmacology

**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

**Graduate Division course:** No

**INTERDEPT 121B Foundations 1 (20 Units) Fall**

*Instructor(s):* Megha Garg  
*Prerequisite(s):* none

**Restrictions:** none

**Activities:** Lecture, Laboratory, Clinical, Independent Study, Web work, Conference

This 2nd Bridges Curriculum course has content in CV, pulmonary, and hematology medicine. It explores health and the individual through a social and behavioral sciences lens. It continues an immersive experience in a longitudinal clinical microsystem clerkship (CMC) and a longitudinal Core Inquiry Curriculum, introducing critical analysis of medical science advances. It concludes with an ARCH 2 (Assessment, Reflection, Coaching, Health) week, which has structured activities for students to review their academic progress and create learning plans.

**School:** Medicine

INTERDEPT 121C Foundations 1 (18 Units) Winter
Instructor(s): Tracy B Fulton
Prerequisite(s): none
Restrictions: No
Activities: Lecture, Clinical, Independent Study, Web work

This Bridges Curriculum course has content in renal, GI, and endocrine medicine. It explores health and society through a sociology, public health, and genetics sciences lens. It continues an immersive experience in a longitudinal clinical microsystem clerkship (CMC) and a longitudinal Core Inquiry Curriculum (CIC). It concludes with an ARCH 3 (Assessment, Reflection, Coaching, Health) week, which has structured activities for students to review their academic progress and create learning plans.

INTERDEPT 121D Foundations 1 (12 Units) Spring
Instructor(s): Brian S Schwartz
Prerequisite(s): None
Restrictions: None
Activities: Lecture, Laboratory, Clinical, Independent Study, Web work

This SOM Bridges Curriculum course introduces the core foundational science content for immunology, rheumatology, microbiology, infectious diseases, leukemia, and lymphoma. It includes the longitudinal Clinical Microsystem Clerkship (CMC) and a longitudinal Core Inquiry Curriculum (CIC).

School: Medicine
Department: Obstetrics, Gynecology And Reproductive Science

INTERDEPT 122A Foundations 1 (11 Units) Fall
Instructor(s): Naomi E Stotland
Prerequisite(s): None
Restrictions: Medical Student in Foundations 1 phase of the curriculum.
Activities: Lecture, Laboratory, Clinical, Independent Study, Web work

This Bridges Curriculum course focuses on health aging and development. It introduces the core foundational science content for reproduction, pregnancy, infancy, gynecology, and urology, and common issues in geriatrics. It includes the longitudinal Clinical Microsystem Clerkship (CMC) and a longitudinal Core Inquiry Curriculum (CIC).

School: Medicine
Department: Obstetrics, Gynecology And Reproductive Science

INTERDEPT 122B Foundations 1 (12 Units) Fall
Instructor(s): Daniel H Lowenstein
Prerequisite(s): None
Restrictions: Medical Student in the Foundations 1 phase
Activities: Lecture, Laboratory, Clinical, Independent Study, Web work

This Bridges Curriculum course focuses on the structure and function of the brain, nervous systems and movement systems. It includes core foundational science content in neuroanatomy, neurophysiology, neuropharmacology, and applicable areas of social and behavioral science. It also includes the longitudinal Clinical Microsystem Clerkship (CMC), a longitudinal Core Inquiry Curriculum (CIC) and the fourth Assessment, Reflection, Coaching, Health (ARCH) week.

School: Medicine
Department: Neurology
May the student choose the instructor for this course? No

INTERDEPT 122C  Foundations 1  (4 Units)  Fall
Instructor(s):  Denise M Connor
Prerequisite(s):  None

Restrictions: Medical Student in Foundations 1 phase of the curriculum

Activities: Lecture, Clinical, Independent Study, Web work

This Bridges Curriculum course focuses on clinical reasoning at the individual patient level. It introduces an approach for communicating critical thinking to others and generating a prioritized differential diagnosis based on an effective problem representation. It includes the longitudinal Clinical Microsystem Clerkship (CMC) and the longitudinal Core Inquiry Curriculum (CIC).

School: Medicine

INTERDEPT 123A  Inquiry Immersion 1  (3 Units)  Winter
Instructor(s):  Nilika S Singhal, Susan M. Miller
Prerequisite(s):  N/A

Restrictions:  No

Activities: Lecture, Independent Study, Web work

This Inquiry Immersion course within the Bridges Curriculum is a two-week block that includes foundational didactics, a selective mini-course, and scholarship skill-building.

School: Medicine
Department: Neurology
May the student choose the instructor for this course?  No
Does enrollment in this course require instructor approval?  No

Repeat course for credit?  No

INTERDEPT 124A  Community Engagement Rotation (CER)  (6 Units)  Fall, Winter, Spring, Summer
Instructor(s):  Elizabeth P Griffiths, Naomi Wortis
Prerequisite(s):  None

Restrictions: Fourth-year medical students

Activities: Lecture, Seminar, Clinical, Project

In this course, students will integrate and apply learning from the entire Bridges curriculum to serving the needs of the community. Students will spend the majority of their time at a chosen community-based site(s) with the opportunity to contribute to a community-engaged project and/or advocate for policy change, while also providing interdisciplinary clinical and/or preventive care. Weekly didactics will include guest speakers, small group exercises, site visits, and reflections.

INTERDEPT 181 Summer Research Fellowship Elective (12 Units) Summer
Instructor(s): Lisa H. Berens, Stuart A. Gansky
Prerequisite(s): None

Restrictions: DDS and IDP students
Activities: Independent Study, Project, Workshop, Lab science

The Summer Research Fellowship Elective offers UCSF dental students the opportunity to participate in intensive, hands-on mentored research. Students work closely with faculty mentors to conduct research on a topic of importance to dentistry. By working directly with leaders in research, students learn the methods, tools, and language of science, an introduction that propels many of them into careers in academia.

INTERDEPT 184 Dental Student Teaching Elective-Didactic/Preclinical (0.5-4 Units) Fall, Spring, Summer
Instructor(s): Staff
Prerequisite(s): none

Restrictions: Must receive permission from the instructor
Activities: Fieldwork

In this course, dental trainees will develop their competencies as educators through direct teaching as teaching assistants and/or development of educational materials and resources.

School: Dentistry
Department: Preventive And Restorative Dental Sciences
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? Yes
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/ Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes

INTERDEPT 185 Dental Student Teaching Elective-Clinical (0.5-4 Units) Fall, Winter
Instructor(s): Staff
Prerequisite(s): none

Restrictions: Must receive permission from the instructor
Activities: Fieldwork

In this course, dental trainees will develop their competencies as educators through direct teaching as teaching assistants and/or development of educational materials and resources. This teaching elective is focused on clinical teaching.

School: Dentistry
Department: Preventive And Restorative Dental Sciences
May the student choose the instructor for this course? Yes
Does enrollment in this course require instructor approval? Yes
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/ Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes
**INTERDEPT 186 Current Issues in Dental Research** (0.5-1 Units) Fall, Winter, Spring  
*Instructor(s):* Lisa H. Berens  
*Prerequisite(s):* None

**Restrictions:** None  
**Activities:** Lecture

Through lectures and group discussions participants will obtain knowledge in dental research. Current topics, research problems, research methodology encompassing basic, applied and clinical sciences will be presented. Faculty presentations of current research will integrate research findings with clinical practice.

**School:** Dentistry  
**Department:** Preventive And Restorative Dental Sciences  
**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
**Is this a web-based online course?** No  
**Is this an Interprofessional Education (IPE) course?** No  
**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** No  
**Repeat course for credit?** Yes

---

**INTERDEPT 194 Advanced Independent Study - Clinical** (3-6 Units) Fall, Winter, Spring, Summer  
*Instructor(s):* John A Davis  
*Prerequisite(s):* none

**Restrictions:** 3rd or 4th year medical student  
**Activities:** Clinical

In this course, students will develop an individualized plan for advanced clinical skills development and work with a mentor to make progress towards these patient care goals. Course duration and unit allotment are determined at the discretion of the course directors.

**School:** Medicine  
**Department:** Medicine  
**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** Yes  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
**Is this a web-based online course?** No  
**Is this an Interprofessional Education (IPE) course?** No  
**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** No  
**Repeat course for credit?** No

---

**INTERDEPT 195 Consortium Interdisciplinary Research** (0 Units) Fall, Winter, Spring  
*Instructor(s):* Daniel P Dohan  
*Prerequisite(s):* Submission of fully approved SF Consortium application.

**Restrictions:** None.

This is a utility course intended to facilitate access to UCSF resources for UC Hastings students doing research on medical topics.

**School:** Medicine  
**Department:** Medicine  
**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** Yes  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
**Is this a web-based online course?** No  
**Is this an Interprofessional Education (IPE) course?** No  
**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** Yes  
**Repeat course for credit?** No

---

**INTERDEPT 196 Medical Student Teaching** (3-15 Units) Fall, Winter, Spring, Summer  
*Instructor(s):* Staff  
*Prerequisite(s): Approval of instructor

**Restrictions:** Approval of instructor  
**Activities:** Fieldwork

In this course, medical students develop their competencies as medical educators through direct teaching and/or development of medical education materials and resources.

**School:** Medicine  
**Department:** Cellular And Molecular Pharmacology  
**May the student choose the instructor for this course?** Yes  
**Does enrollment in this course require instructor approval?** No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
**Is this a web-based online course?** No  
**Is this an Interprofessional Education (IPE) course?** No  
**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** No  
**Repeat course for credit?** Yes
INTERDEPT 197 Group Supervised Study (1-12 Units) Fall, Winter, Spring, Summer

Instructor(s): John A Davis, Marieke Kruidering
Prerequisite(s): INTERDEPT 121A-B-C-D
INTERDEPT 122A-B-C
INTERDEPT 123A

Restrictions: Students must get instructor approval

Activities: Independent Study

This course is a program of the foundational sciences that are most relevant to clinical practice and the USMLE Step 1 and/or Step 2 exams.

School: Medicine
Department: Medicine

May the student choose the instructor for this course? No

May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes

INTERDEPT 198 Intermediate Independent Study (1-12 Units) Fall, Winter, Spring, Summer

Instructor(s): Staff
Prerequisite(s): None

Restrictions: Students must get instructor approval

Activities: Independent Study

This course is a structured program of interdisciplinary study to take students through all of the basic, clinical, and social science material represented on the USMLE Step 1 licensing exam.

School: Medicine
Department: Cellular And Molecular Pharmacology

May the student choose the instructor for this course? Yes
Does enrollment in this course require instructor approval? Yes
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes

INTERDEPT 199A Advanced Independent Study A (3 Units) Fall, Winter, Spring, Summer

Instructor(s): John A Davis
Prerequisite(s): None

Restrictions: 4th Year Medicine

Activities: Independent Study

This two-week course involves interdisciplinary study to take students through the basic, clinical, and social science material relevant to USMLE Step 2 exam, the most advanced licensing exam that medical students are required to complete. After creating and receiving approval for a study plan based on their individualized performance data from assessments in the curriculum and the USMLE Step 1 exam, students will use the plan to guide their independent preparation for Step 2 CK.

School: Medicine
Department: Cellular And Molecular Pharmacology

May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? Yes
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No

Repeat course for credit? Yes
INTERDEPT 199B  Advanced Independent Study B (6 Units)  Fall, Winter, Spring, Summer
Instructor(s): John A Davis
Prerequisite(s): None

Restrictions: 4th year medicine; instructor approval required.
Activities: Independent Study

This four-week course involves interdisciplinary study to take students through the basic, clinical, and social science material relevant to USMLE Step 2 exam, the most advanced licensing exam that medical students are required to complete. After creating and receiving approval for a study plan based on their individualized performance data from assessments in the curriculum and the USMLE Step 1 exam, students will use the plan to guide their independent preparation for Step 2 CK.

School: Medicine
Department: Cellular And Molecular Pharmacology

INTERDEPT 204  Medical Science Training Program Related Study (0 Units)  Fall, Winter, Spring, Summer
Instructor(s): Aimee W. Kao
Prerequisite(s): None.

Restrictions: None.

Full time study in other Medical Science Training Program (MSTP) components at UCSF.

School: Graduate Division
Department: Biomedical Sciences Program

INTERDEPT 205  Preparing for Health Professions School (3 Units)  Fall, Winter, Spring, Summer
Instructor(s): Alma M. Martinez, Sharon L Youmans
Prerequisite(s): prerequisites vary according to program

Restrictions: 1. Students must be accepted into a UCSF Post Baccalaureate Program (medicine, dentistry, pharmacy). 
2. Students must have a Bachelors Degree.
Activities: Seminar, Project

This program prepares students from disadvantaged backgrounds for matriculation to professional schools. UCSF faculty lead classes on health disparities, ethics, cultural sensitivity, and care for underserved communities and serve as mentors for students. Students develop skills for future success in professional schools including MCAT/DAT preparation. Students develop research skills in a CQI project and lead seminars on health topics. Students take science classes at UCB-Extension.

School: Graduate Division
Department: Medicine Post-Baccalaureate

INTERDEPT 206  Medicine Post-Baccalaureate Program Related Study (0 Units) Summer
Instructor(s): Alma M. Martinez
Restrictions: Students in the Medicine Post-Baccalaureate Program

Full time study in other Medicine Post-Baccalaureate components at UCSF

School: Graduate Division
Department: Medicine Post-Baccalaureate
INTERDEPT 482 Dental Implantology (1 Units) Fall, Winter, Spring, Summer
Instructor(s): Akshay Govind, Arun B. Sharma, Guo-Hao Lin
Prerequisite(s): None.
Restrictions: DPG and 3rd- or 4th-year dental students only
Activities: Lecture
A didactic and collaborative elective course on dental implantology. The diagnostic, surgical, laboratory, restorative, periodontal, and maintenance phases of dental implant treatment will be presented. Course also include critical appraisal of current implant literature.

School: Dentistry
Department: Oral And Maxillofacial Surgery
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes
