MEDICINE 140.15 Subinternship in Medicine - Kaiser San Francisco (6 Units) Fall, Winter, Spring, Summer
Instructor(s): Aaron T Smith
Prerequisite(s): Successful completion of Medicine 110

Restrictions: 4th year standing

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

We welcome fourth year medical students as sub-interns on our inpatient medical ward teams, with a hospitalist attending, resident, and two interns. In addition to inpatient rounding service, students are also exposed to one week on the admitting rotation. Students actively participate in all aspects of patient care, similar to an intern, including writing notes, entering orders, calling consults, participating in a robust multi-disciplinary healthcare team, and updating family members.

MEDICINE 140.19 Clinical Cardiology - VAMC-SF (6 Units) Fall, Winter, Spring, Summer
Instructor(s): John R Teerlink
Prerequisite(s): Medicine 110.

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Students will learn how to evaluate and manage cardiology patients by working closely with cardiology attending physicians and fellows in an inpatient setting. Through participation in CCU and consult rounds, as well as conferences, students will become familiar with the presentation and management of CCU patients. In addition, the course will provide students with many opportunities to practice and develop the ability to read and evaluate ECGs.

MEDICINE 140.21A Gastroenterology/Liver - Highland Hospital - AHS (3 Units) Fall, Winter, Spring, Summer
Instructor(s): Christina Chou
Prerequisite(s): MEDICINE 110

Restrictions: 4th year medical students Must have completed core Internal Medicine rotation.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course will provide the student with a broad exposure to gastroenterology and hepatology in an underserved setting. As a functioning member of the team, the student will evaluate, present, and assist in the management of patients seen in the outpatient GI/Liver clinic, the endoscopy unit, and on the inpatient GI/Liver service.

MEDICINE 140.22 Narrative Medicine and Podcasting with The Nocturnists (6 Units) Fall, Winter, Spring, Summer
Instructor(s): Emily A Silverman
Prerequisite(s): all core clerkships

Restrictions: none

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Physicians, privy to an amazing variety of vulnerable experiences shared by humanity, have always been natural storytellers. Organized by The Nocturnists, this elective will introduce medical students to new media and communication, including podcasting, as well as live storytelling events. Students will learn the craft of podcasting, and will leave the elective with a strong mental framework for using podcasts and other narrative-centric media tools to communicate crucial stories in medicine.

MEDICINE 140.24 Rheumatology (6 Units) Fall, Winter, Spring, Summer
Instructor(s): Sarah E Goglin
Prerequisite(s): Medicine 110.

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

Students will learn to evaluate patients with joint pain as well as systemic illness in this 'hands-on' rotation. Students will evaluate patients with rheumatology attending physicians in the outpatient clinics at UCSF, SFGH and the VA. Students will see inpatients with fellows on the rheumatology consult service at Parnassus. Students will attend pre/post clinic conferences and two weekly didactic conferences.

**MEDICINE 140.45 Endocrine Metabolism - VAMC-SF (3 Units) Fall, Winter, Spring, Summer**

*Instructor(s):* Anne L Schafer

*Prerequisite(s):* Medicine 110 and consent of instructor.

**Restrictions:** None.

**Activities:** Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

An introduction to the diagnosis and treatment of endocrine-metabolism diseases. The areas covered include those endocrinopathies involving the major endocrine glands, as well as diabetes mellitus and hyperlipemias. Patients will be examined and treated in both the inpatient and outpatient services. Attendance at 3 clinics per week and daily work rounds are required activities as well as post clinic conferences on Fridays.

MEDICINE 140.50 Clinical Care and Teaching at UCSF's Student Homeless Clinic (3 Units) Fall, Winter, Spring, Summer
Instructor(s): William B. Shore, Daniel M Wlodarczyk
Prerequisite(s): None

Restrictions: Fourth year students in the School of Medicine
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

Many medical students have an interest in working with vulnerable populations and have volunteered at the UCSF Student Homeless Clinic during their pre-clinical years. This elective would allow fourth year medical students to return to clinic with advanced skills; this would allow them to further refine their clinical skills, learn about issues facing homeless individuals, and provide supervision to the pre-clinical students.

Restrictions: none
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

During the 4 week Sub-Internship, students will assume the role of the intern. The rotation is on a 5 day call cycle. You will work closely with your supervising senior resident in the admission, work-up and day to day management of patients admitted to the medicine service. You will be exposed to patients with diverse socioeconomic, cultural, and ethnic backgrounds, and with wide ranging acute and chronic medical diagnoses. You will be expected to manage 4-6 patients at a time.

MEDICINE 141.02 Cardiology Interprofessional Elective (0 Units) Fall, Winter, Spring, Summer

Instructor(s): Crystal Zhou
Prerequisite(s): None required

Restrictions: MS4 students

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The UCSF Division of Cardiology services 7 outpatient clinics in the Bay Area and they provide care to over 12,000 patients each year. Primary sites include: UCSF Cardiovascular Care and Prevention Center (Mission Bay) and UCSF Cardiac Rehabilitation and Wellness Center (Parnassus). Medical students (MS3 and MS4 preferred) will be paired with advanced practice pharmacy students to provide direct patient care under the supervision of licensed professionals.

### MEDICINE 141.17 Interprofessional Addiction Care (6 Units) Fall, Winter, Spring, Summer

**Instructor(s):** Meghan T O’Brien, Triveni B Defries

**Prerequisite(s):** None

**Restrictions:** 4th Year student in good academic standing

**Activities:** Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

During this 4-week elective, MS4s will build confidence and skill caring for patients with substance use disorders by joining ZSFG’s inpatient Addiction Care Team (ACT)! Interprofessional learners will join the consultation team of attending physician, fellow, substance use navigator and licensed vocational nurses to support hospital-wide care for patients who use drugs and alcohol. Students will work collaboratively with interprofessional learners through various activities.

MEDICINE 170.34A  Asian American Pacific Islander Health Disparities (1 Units) Fall
Instructor(s): Cindy J. Lai
Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The primary goal of this elective is to introduce students to the health issues prevalent in the Asian American Pacific Islander communities (API). During the course, students will learn to define the health disparities faced by the API community and acquire a background in topics such as hepatitis B, cardiovascular risks, and pharmacogenomics to provide patient education and improve community outreach.

MEDICINE 170.36  MSTP Into the Clinic! (3 Units) Fall, Winter
Instructor(s): Aimee W. Kao
Prerequisite(s): MSTP

Restrictions: MSTP students in the final year of their graduate studies planning to return to medical school this spring.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course is an intensive re-introduction to clinical medicine for MSTP students completing graduate studies and planning to return to medical school this spring. The course includes 5 half-days of didactics where students review and practice history taking, physical exam skills, oral presentations, and analysis of basic clinical data (labs, EKGs etc.) through clinical cases. Skills are reinforced through 3-5 afternoons of clinical immersion.

MEDICINE 170.37  National Transgender Health Summit (1 Units) Spring
Instructor(s): Jae Sevelius
Prerequisite(s): none

Restrictions: None.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The National Transgender Health Summit is a two day conference for medical providers and students to increase awareness of transgender (trans) issues in health care. The Summit aims to increase provider skills in the provision of optimal health care for trans patients and to provide a professional forum for the sharing of best practices, innovative techniques, and cutting edge research among providers who wish to gain expertise in providing competent care for trans patients.

MEDICINE 170.39 Hospital-Based Medicine: A Clinical Skills Tutorial (0.5-1.5 Units) Fall, Winter
Instructor(s): Susan M Wlodarczyk
Prerequisite(s): Students must contact Thomas.yu@va.gov for approval prior to registration.

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This course introduces students to the art and science of caring for inpatients. Students will spend 4-8 half days working one-on-one with an attending in our VA Faculty Hospitalist group, learning from a mix of inpatients. Students will practice history-taking, physical exam, written and oral presentations, and will be introduced to pre-rounding and multidisciplinary care. Students will complete a learning plan and will confer with faculty at course end about progress and future goals.

MEDICINE 170.41 Word on the Wards: Inpatient Health Education at SFGH (1 Units) Fall, Winter, Spring
Instructor(s): Kelly B Han
Prerequisite(s): None

Restrictions: 1st and 2nd year students from schools of Medicine, Pharmacy, Nursing and PT are all welcome to take this course.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

Word on the Wards is an interprofessional program, in collaboration with the SFGH Hospitalist Division, in which UCSF students act as health coaches for patients on the SFGH wards. This elective consists of an 8-hour training session and two clinical shifts. During the training session, students will learn about working with underserved populations, their role as a health coach, health topic content, and health coaching techniques. They will apply these skills during their clinical shifts.

Instructor(s): Cindy J. Lai
Prerequisite(s): N/A

Restrictions: N/A

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Master clinicians develop their diagnostic acumen by learning through case discussions. Cases allow students to learn history taking, differential diagnosis, disease management, and other valuable skills to prepare for clinical years. Each week in this elective, a senior medical student or resident will present a real case. The class will walk through a fun, challenging, and interactive discussion on how to think about the case and reason out the correct diagnosis and appropriate management.

Instructor(s): Manuel A Tapia
Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

The focus of this elective is promoting education about health sciences in under-represented communities via service learning. UCSF students will learn how to mentor, design curriculum, and teach by interacting with under-represented high school sophomores in an 8-session program. This is an interdisciplinary elective involving students from schools of medicine, nursing, dental, pharmacy and physical therapy.

MEDICINE 170.49 Native Health Elective (1 Units) Fall  
*Instructor(s): Michelle Guy* 
Prerequisite(s): None

Restrictions: None

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects

This elective offers an introduction to and overview of the health of Native American/Alaska Native communities. The course will examine both historical and political influences on Native health, as well as provide cultural context and examples of resilience within Indigenous communities. We start the course with a brief history of Native policies, including the development of the Indian Health Service. We will then discuss various disparities affecting Native communities (e.g. access to care).

School: Medicine  
Department: Medicine

May the student choose the instructor for this course? No  
Does enrollment in this course require instructor approval? No
