

NURSING, ADVANCED PRACTICE (NURSADVPR)

NURSADVPR 200 Concepts and Theory Application for Advanced Practice Nurses (3 Units)

Offered In: Summer

Instructor(s): Staff
Prerequisite(s): None

Restrictions: Open to PB-DNP Program students or consent of instructor

Activities: Lecture, Seminar

In this course, students will use critical thinking to evaluate nursing science and theory, and the impact on contemporary healthcare. Theories and conceptual frameworks that underpin knowledge, scholarship and practice will be discussed. Middle range theories from nursing and other disciplines will be evaluated for their application to healthcare issues, and their support of clinical inquiry and practice interventions that enhance outcomes.

May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes
Repeat course for credit? No

NURSADVPR 202 Essentials of Human Genomics for the Advanced Practice Nurse (1 Units)

Offered In: Summer

Instructor(s): Staff
Prerequisite(s): None

Restrictions: Course open to PB-DNP program students or with consent of instructor

Activities: Lecture

The course will focus on clinical practice, scientific, technologic, social, policy, and regulatory aspects of genomics in clinical practice. The course will provide an introductory survey of these topics aligned with the Essential Competencies in Genomics for Advanced Practice Nurses.

School: Nursing
Department: Family Health Care Nursing

NURSADVPR 203 Structural Racism, Healthcare and Social Justice (2 Units)

Offered In: Summer

Instructor(s): Staff
Prerequisite(s): None

Restrictions: Course open to PB-DNP students or with consent of instructor

Activities: Lecture

The course will introduce learners to the concepts of structural racism and other inequities and the implications for advanced nursing practice. The link between historical events and current health disparities are analyzed. The intersectionality of racism with poverty and other marginalized and underserved communities will be discussed in depth.

NURSADVPR 204 Advanced Health Policy and Advocacy (3 Units)

Offered In: Fall

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture, Discussion

This course focuses on critical analysis of health policy in support of strategic action and advocacy. The course will cover health policy analysis within the context of economic, legal, social justice, and ethical issues and stimulate debate for decision-making and action. Partnerships with professional and/or community agencies that present opportunities to apply and evaluate health policy intervention and policies related to current healthcare issues will be explored.

NURSADVPR 205 Evidence Appraisal for the Nurse Leader (3 Units)

Offered In: Fall

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course open to PB-DNP program students or with consent of instructor

Activities: Lecture

This foundational course in nursing scholarship is designed to provide the advanced-level nurse with the necessary knowledge and skills to analyze and utilize research during administrative, policy or clinical decision-making. The course is designed to facilitate evaluation of the research process, development of clinical questions, and the critical appraisal of research papers, with an equitable approach in their practice as advanced-level clinicians and leaders in their nursing disciplines.

NURSADVPR 206 Principles of Clinical Prevention and Population Health (3 Units)

Offered In: Fall

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course offered to PB-DNP students only or with consent of the instructor

Activities: Lecture, Discussion

This course investigates clinical prevention, health promotion, and population health concepts through literature review and case studies. Evidence-based, epidemiologic, and population health approaches will be applied to healthcare decision making at the individual and systems level.

School: Nursing

Department: Family Health Care Nursing

May the student choose the instructor for this course? Yes

NURSADVPR 207A Foundations of interprofessional practice for nurse leaders (0-1 Units)

Offered In: Fall, Winter, Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to students in the PB-DNP Program or with consent of instructor; course is run in-process over three quarters

Activities: Seminar

This course will provide foundational content on interprofessional (IP) collaborative practice skills for delivering high-quality, patient-centered care on IP teams. Students will participate in IP small group sessions (Core Principles of Interprofessional Practice) to apply the skills learned with a trained facilitator and participate in IP simulation with standardized patients. Course spans three quarters; students enroll for 1u for one quarter and 0u for the remaining quarters.

School: Nursing

Department: Family Health Care Nursing

May the student choose the instructor for this course? Yes

Does enrollment in this course require instructor approval? Yes

Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory), In Progress (IP, SP/UP) grading allowed

NURSADVPR 208 Health Assessment for Advanced Practice (2 Units)

Offered In: Winter

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture, Discussion

This course focuses on assessment concepts and skills to determine the health status of patients across the life span. Topical areas will include the collection and interpretation of clinical data derived from the history and physical exam for advanced practice students

School: Nursing

Department: Community Health Care Systems

May the student choose the instructor for this course? Yes

NURSADVPR 209 Clinical Pharmacology for Advanced Practice (3 Units)

Offered In: Winter

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or consent of instructor

Activities: Lecture, Discussion

Course addresses pharmacotherapeutic and pharmacokinetic concepts across broad categories of pharmacologic agents. Key physiologic changes across the lifespan that impact pharmacologic agent effect and action are highlighted. Course content builds knowledge and skills to be able to assess, diagnose and manage common health problems, and analyzes relevant legal, regulatory, quality and safety issues relating to advanced practice nurse's pharmacologic agent furnishing and drug ordering.

NURSADVPR 210A Introduction to the PB-DNP Program: Prelude to DNP Success (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course open to PB-DNP students or with consent of instructor

Activities: Workshop, Discussion

This first course in the post-Baccalaureate to Doctor of Nursing Practice (PB-DNP) curriculum provides foundational content to support student success. Students will be guided through the expectations of the 3-year curriculum, and supported in accessing campus resources, navigating hybrid courses and demonstrating basic academic skills needed for their program of study. Opportunities for interacting and collaborating with their cohort and program and specialty faculty and staff will be provided.

NURSADVPR 211 Physiology and Pathophysiology for Advanced Practice (2 Units)

Offered In: Winter

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture, Discussion

This course integrates and applies system-focused physiologic and key pathophysiologic concepts across the lifespan, supporting the foundation for advanced-level nursing education and practice. Emphasis is on the association of physiological alterations with clinical manifestations.

School: Nursing

Department: Community Health Care Systems

May the student choose the instructor for this course? Yes

NURSADVPR 212 Improving Health Outcomes by Advancing QI and Safety (3 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture, Discussion

Students will evaluate the history of quality and safety issues, and analyze current research, quality improvement, safety and management models, and innovative strategies implemented in healthcare. Emphasis is placed on the role of the DNP nurse leader in developing and leading quality initiatives to improve health outcomes for diverse populations, health systems and patients.

NURSADVPR 213 Evidence-Based Principles and Practice (3 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to BSN-DNP learners or with instructor approval

Activities: Lecture, Discussion

This course will provide the DNP learner with an opportunity to review evidence-based practice skills, including identifying a healthcare issue and searching for and appraising the best available evidence. Learners will complete the process by applying an evidence-based practice model to affect change and develop and evaluate measurable outcomes. To complete the process, they will identify strategies for dissemination and sustainability of an evidence-based quality improvement (EBQI) project.

NURSADVPR 219A EBQI Project I: Project Preparation (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: The course is open to BSN-DNP learners or with consent of instructor

Activities: Lecture, Discussion

This is the first of the DNP project series courses, which will occur sequentially and will be offered concurrently with the development of the EBQI Project. This course supports learners in assessing areas in need of improvement and the strengths and supports within the setting in preparation for conceptualizing, planning, and designing an evidence-based DNP project proposal that addresses improving a practice or microsystem issue.

NURSADVPR 220 Common Symptom Assessment and Management (3 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with instructor consent

Activities: Lecture, Discussion

This course focuses on commonly encountered signs and symptoms of illness across the life span. Symptoms and signs will be analyzed using a clinical decision-making model. The underlying causes and appropriate management of common illnesses are evaluated.

School: Nursing

Department: Family Health Care Nursing

May the student choose the instructor for this course? Yes

NURSADVPR 221 Foundational Seminar in Primary Care (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): Taken concurrently with NURSADVPR 250 Common Symptom Assessment and Management

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Seminar

This course is taken concurrently with NURSADVPR 250 Common Symptom Assessment and Management, and provides specialty content necessary for primary care nurse practitioners. Course content will utilize case presentations, problem-based learning approaches, as well as other relevant learning strategies. Application of NURSADVPR 250 content will be made through problem-based learning.

NURSADVPR 222 Sexual and Reproductive Health Promotion (2 Units)

Offered In: Winter

Instructor(s): Staff

Prerequisite(s): None.

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Discussion

This course provides an exploration of theories, concepts, and knowledge necessary to maintain and promote the sexual and reproductive health of individuals. Emphasis is on the application of current research regarding clinical decision-making and management of pregnancy, postpartum and common gynecological conditions.

School: Nursing

Department: Family Health Care Nursing

NURSADVPR 222B Contraception (1 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to BSN-DNP students or with consent of instructor

Activities: Workshop

This course explores contraception and pregnancy options in the outpatient setting. Content includes evidence-based practice for managing pharmacologic and non-pharmacologic contraception, pregnancy counseling and abortion care.

School: Nursing

Department: Family Health Care Nursing

May the student choose the instructor for this course? Yes

NURSADVPR 230 Theoretical Perspectives on Mental Illness (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Discussion

This course examines major theories of mental illness and their implications for understanding the etiology and treatment of psychiatric conditions. Biological, psychological, and social models will be analyzed and applied to the assessment and management of mental health problems. Ethical issues raised by different theoretical perspectives will be discussed.

School: Nursing

NURSADVPR 231 Assessment and Management of Common Mental Health Conditions (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture, Discussion

Course introduces students to common mental health conditions encountered by advanced practice nurses across the continuum of care. Course analyzes clinical presentations, contributing factors, structural influences, and appropriate management and self-care for patients and families across the life span

School: Nursing

Department: Community Health Care Systems

May the student choose the instructor for this course? Yes

NURSADVPR 236 Adult Psychotherapeutic Treatment Modalities (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course is open to BSN-DNP learners or with consent of instructor

Activities: Workshop

This course focuses on principles of supportive psychotherapies with adults experiencing a range of psychiatric problems. It also reviews models of cognitive-behavioral and motivational interventions. It is designed to use clinical case materials as the basis for discussion of assessment, goal setting, and psychotherapeutic intervention.

School: Nursing

NURSADVPR 240A Management of Acute and Chronic Illness (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor.

Activities: Lecture

This course is one of four disease management courses that focuses on the diagnosis and treatment of acute and chronic illnesses affecting adult and older adult patients. Students synthesize pathophysiologic concepts using evidence-based resources to analyze clinical data and formulate differential diagnoses, select diagnostics, and develop management strategies. The course objectives are met through reviewing prerecorded lectures and synchronous didactic content, and case study analyses.

NURSADVPR 240B Differential Diagnosis in the Hospitalized Adult (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to BSN-DNP students or with instructor approval

Activities: Discussion

This course is part of a series of four disease management courses that focus on the diagnosis and treatment of acute and chronic illnesses affecting adult and older adult patients. Learners synthesize pathophysiologic concepts using evidence-based resources to analyze clinical data and formulate differential diagnoses, select diagnostics, and develop management strategies. The course objectives are met through prerecorded lectures, synchronous didactic content, and case study analyses.

NURSADVPR 250 AGPCNP Common Symptom Assessment (1 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): Taken concurrently with Common Symptom Assessment and Management course

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Seminar

This seminar provides content specific to the AGPCNP role in assessment and management of symptoms commonly encountered in primary care of adults. Application from the course will be made through problem-based learning.

School: Nursing

Department: Community Health Care Systems

May the student choose the instructor for this course? Yes

NURSADVPR 260 Health Promotion for Chronically and Critically Ill Children (3 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP program students or with consent of instructor

Activities: Lecture

This course focuses on ethical and culturally-sensitive pediatric health promotion strategies for infants, children, and adolescents with an additional focus on health promotion application while managing complex acute, critical, and chronic health conditions in acute care settings. Emphasis is on foundations for child health and wellness, including growth and development milestones, immunization scheduling, and screening and surveillance for physiologic and behavioral/mental health disorders.

NURSADVPR 261 Physiologic Development in the Pediatric Population (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Lecture

Course addresses organ system development and function as modified by evolving system maturation and level of health and illness in the infant, child, and adolescent. Additional factors influencing pediatric health and illness including the human genome, congenital anomalies, environmental exposures, and the microbiome are components of discussion on the impact to organ system development and function.

NURSADVPR 270 Assessment and Health Promotion for Neonates and Infants (3 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or consent of instructor

Activities: Lecture

This course addresses concepts in advanced assessment utilized to determine the health status of neonates and infants up to 2 years old. Emphasis is placed on the systematic collection and interpretation of clinical data derived from comprehensive patient and family histories, physical examinations, and diagnostic interventions. Discourse will focus on health promotion and disease prevention.

NURSADVPR 271 Advanced Practice Neonatal Seminar (1 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Discussion

This seminar will prepare the neonatal advanced practice registered nurse (APRN) to discuss care planning for neonatal and infant patients in acute and convalescent care settings. Interactive exercises are offered to analyze, discuss and cultivate fundamental skills in neonatal assessment, management, and team communication.

NURSADVPR 272 Impact of Perinatal Health on the Fetus and Neonate (1 Units)

Offered In: Winter

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or consent of instructor

Activities: Lecture, Discussion

This course examines perinatal issues of the pregnant patient that impact the health of the fetus and neonate. The course will support knowledge acquisition related to routine perinatal care, and explore the effect of acute and chronic perinatal conditions, and their associated evidence-based therapeutic interventions, on the pregnant patient and fetus

NURSADVPR 291 Advanced Sexual and Reproductive Health (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to learners in the post-baccalaureate to DNP (BSN-DNP) program pathway or with the consent of the instructor.

Activities: Lecture

The course will examine, analyze, and apply the clinical management of health conditions, diseases, and disorders of sexual and reproductive health, including those of gender non-conforming individuals, in the reproductive and post-reproductive years. A bio-psychosocial framework and social determinants of health context will be applied. The focus will be on identification, management, counseling, and evaluation of care, and collaboration with the interprofessional team.

NURSADVPR 400A DNP Leadership Practicum I (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): Completion of or concurrent enrollment in EBQI Project I course

Restrictions: Open to BSN-DNP students or with instructor approval

Activities: Independent Study

This practicum course is taught concurrently with the EBQI Project I course and supports the DNP learner in developing leadership skills that are aligned with the EBQI project. Activities may include mentoring, teaching, decision-making, consulting, or other collaborations that support the initial stages of the development of the EBQI project.

NURSADVPR 420B FNP Clinical Practicum B (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course open to BSN-DNP students or with instructor approval

Activities: Clinical, Conference

This course offers opportunities to apply and evaluate theories, concepts, and skills in clinical settings under the supervision of a clinical preceptor. The focus is on the development of the family nurse practitioner as generalist in the primary care setting emphasizing health promotion health maintenance and illness prevention within the context of collaborative practice.

NURSADVPR 421 FNP Reproductive Health Clinical Practicum A (3 Units)

Offered In: Fall, Winter, Spring, Summer

Instructor(s): Andrea Kuster

Prerequisite(s): Successful completion NURSADVPR 208 and SKILLS LAB 420

Restrictions: None.

Activities: Clinical

This course offers opportunities to apply and evaluate theories, concepts and skills in clinical settings under the supervision of a clinical preceptor. Focus is on the development of the family nurse generalist in a reproductive health care setting, emphasizing health promotion, health maintenance, and illness prevention within the context of collaborative practice.

NURSADVPR 440A Adult Gerontology Acute Care APRN Clinical Practicum (1 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with instructor approval

Activities: Clinical

The course applies health assessment concepts and skills under supervision of clinical preceptors. Students perform assessments of hospitalized adults with acute or chronic illness and develop the ability to differentiate between normal and abnormal findings. The course develops the role of the Adult Gerontology Acute Care Advanced Practice Registered Nurse (APRN) with emphasis on interprofessional collaborative relationships and the continuum of care across care settings.

School: Nursing

Department: Physiological Nursing

May the student choose the instructor for this course? Yes

Does enrollment in this course require instructor approval? Yes

Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)

Graduate Division course: No

NURSADVPR 440B AGACNP Hospital Medicine Clinical Practicum I (0-2 Units)

Offered In: Fall, Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course is open to BSN-DNP learners or with instructor approval

Activities: Clinical, Lab skills

This course provides clinical experience and practical application of advanced history-taking and physical examination skills, and development of assessments and plans of hospitalized adults. Learners will apply clinical decision-making models under the guidance and supervision of clinical preceptors.

School: Nursing

Department: Physiological Nursing

NURSADVPR 450 AGPCNP Clinical Practicum (3 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course open to PB-DNP students or with consent of instructor.

Activities: Clinical, Conference

Course provides clinical experiences focusing on the advancement of history and physical examination skills while acquiring proficiency in developing health promotion and maintenance plans for adult gerontology primary care nurse practitioner students.

School: Nursing

Department: Community Health Care Systems

May the student choose the instructor for this course? Yes

Does enrollment in this course require instructor approval? Yes

NURSADVPR 450B AGPCNP Clinical Practicum B (3 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Course open to BSN-DNP students or with instructor's approval

Activities: Clinical

This second clinical course in a series of five provides AGPCNP students with hands-on clinical experience managing complex adult and geriatric patients in diverse clinical settings. Emphasizing information gathering and physical examination skill refinement, the course builds foundational competencies in clinical judgment and plan development, preparing students for independent practice in the adult-gerontology primary care role.

NURSADVPR 460A ACPNP Clinical Practicum I (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Clinical, Conference

This clinical course integrates scientific knowledge and clinical practice to develop emerging advanced assessment, diagnostic, and management skills in pediatric specialty care settings. Focus is on detailed data gathering, refinement of physical exam skills, and development of a problem list for infants, children, and adolescents with and/or without complex acute, critical, or chronic health conditions.

NURSADVPR 470 Neonatal NP Clinical Practicum (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor.

Activities: Clinical

The clinical practicum provides opportunities in which the student integrates scientific knowledge and theory, with clinical assessment and management skills into the care of hospitalized neonates. Students build skill in comprehensive health assessments, problem solving and use of critical thinking to create and execute care plans. Students also build proficiency in effective consultation, communication and collaboration with neonatal providers, staff and families.

NURSADVPR 480 AGCNS Clinical Practicum (2 Units)

Offered In: Spring

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to PB-DNP students or with consent of instructor

Activities: Clinical

This foundational clinical course for the AGCNS student in the BSN to DNP program provides the opportunity to apply health assessment concepts and skills under the supervision of clinical preceptors. Students will practice advanced assessment, intervention and management skills in the three spheres of CNS practice: patient, staff and health systems

NURSADVPR 480B AGCNS Clinical Practicum II (2 Units)

Offered In: Summer

Instructor(s): Staff

Prerequisite(s): None

Restrictions: Open to BSN-DNP learners or with instructor approval

Activities: Clinical

This clinical course provides opportunities for the adult gerontology clinical nurse specialist (CNS) to apply advanced health assessment concepts and skills under the supervision of a CNS preceptor or other advanced practice provider in the acute care setting. Learners develop competency in addressing the three spheres of CNS influence: patient, nurse, and system while focusing on adult gerontology care.
