PERIODONTICS (PERIODONT)

PERIODONT 180.1  Advanced Clinical Periodontology-Elective (2 Units)  Fall, Winter, Spring
Instructor(s): Yogalakshmi Rajendran, Yvonne L Kapila, Guo-Hao Lin
Prerequisite(s): none

Restrictions: This course is limited to D4 and IDP4 students
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The goal of this course is to Introduce advanced periodontal surgical therapy to dental students who are not interested in specializing. The didactic component: will help the students to expand their knowledge in periodontal surgical concepts. The clinical component: will help the student to learn periodontal surgical therapy of mild-moderate difficulty. This elective course will last three (3) quarters. Successful participation all both quarters is required.

School: Dentistry
Department: Orofacial Sciences
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? Yes
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/ Unsatisfactory), In Progress (IP, SP/UP) grading allowed
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

PERIODONT 407.10  Periodontal Education and Communications Strategies (1 Units)  Fall, Summer
Instructor(s): Robert W. Parr, Guo-Hao Lin
Prerequisite(s): None

Restrictions: First year PG Periodontology students.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This didactic 2 quarter course will teach strategies to implement for patient communication, motivation, and compliance. Problems in interpersonal relationships with patients, employees, and referring dentists will be discussed with methods of successful resolution developed. Each student will be required to develop an office mission statement.

May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No
Repeat course for credit? Yes

PERIODONT 411.01  Introduction to Postgraduate Periodontology, Part 1 (1.5 Units)  Summer
Instructor(s): Guo-Hao Lin, Gary C Armitage, Robert W. Parr, Mark I Ryder, Yvonne L Kapila
Prerequisite(s): None.

Restrictions: Enrollment in the first year of the Postgraduate Program in Periodontology
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this Summer quarter introductory didactic course to the periodontal specialty, the postgraduate student will receive core information and training on the biological basis and clinical approaches for the diagnosis and treatment of periodontal diseases and for implant therapy prior to commencing further coursework and patient care. Instruction is primarily focused on students gaining knowledge of periodontal principles and their application to clinical care.

PERIODONT 411.02 Introduction to Advanced Periodontology, Part 2 (1.5 Units) Fall  
Instructor(s): Guo-Hao Lin  
Prerequisite(s): Periodont 411.01  
Restrictions: Enrollment in the first year of the periodontology postgraduate program  
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  
In this Fall Quarter introductory course, the postgraduate student receives instruction on core information for the biological basis of the diagnosis, treatment, and assessment of periodontal diseases and Implant Dentistry. The overall objective of the course is to build on information provided in the summer quarter to move student beyond introductory periodontal principles to learning basic procedures, surgical strategies and preparation of models and other data records for surgery planning.

PERIODONT 411.03 Introduction to Advanced Periodontology, Part 3 (1.5 Units) Winter  
Instructor(s): Guo-Hao Lin  
Prerequisite(s): Periodontology 411.01, Periodontology 411.02  
Restrictions: Enrollment in the first year of the periodontology postgraduate program  
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  
In this Winter Quarter introductory course, the postgraduate student continues to receive instruction on core information for the biological basis of the diagnosis, treatment, and assessment of periodontal diseases and Implant Dentistry. This course includes instruction on the theoretical aspect of different surgical and non surgical techniques.

PERIODONT 413 Contemporary Periodontal Topics (1 Unit) Fall, Winter, Spring, Summer  
Instructor(s): Guo-Hao Lin  
Prerequisite(s): N/A  
Restrictions: Enrollment in the first year of the postgraduate periodontology program.  
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  
This year long didactic course complements the 411 series to move student beyond understanding introductory periodontal principles so they can start applying these principles to clinic care: using basic procedures, non-surgical strategies and preparing data records for treatment planning and therapeutic procedures based on relevant literature and clinical experience. Emphasis and expectations will shift each quarter as student advances in acquisition and demonstration of knowledge.

PERIODONT 414  Sedation in Dental Practice  (4 Units)  Summer
Instructor(s): Guo-Hao Lin, Yvonne L Kapila
Prerequisite(s): DDS/DMD Degree, Residency Status

Restrictions: Residents

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course provides 40 hours of didactic instruction in minimal and moderate sedation. It is designed in accordance with the American Dental Association’s Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students. It will focus on preparation of sedation device and administration of controlled substances to achieve an ideal level of conscious sedation.

PERIODONT 419.01 Clinical Periodontics (6 Units) Summer
Instructor(s): Guo-Hao Lin
Prerequisite(s): None
Restrictions: Enrollment in 1st year of the postgraduate periodontology program.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion
This clinical clerkship provides a comprehensive experience in evaluation and provision of periodontal care using non surgical periodontal procedures. Residents are expected to apply their knowledge of basic procedures, non-surgical strategies and preparing data records for treatment planning and performing therapeutic procedures. Emphasis and expectations shift each quarter as student advances.

**PERIODONT 431 Periodontal Practice Management (1 Units) Winter, Spring**  
*Instructor(s):* Robert W. Parr, Guo-Hao Lin  
*Prerequisite(s):* Enrollment in the third year of the postgraduate program in periodontology at the University of California, School of Dentistry  

Restrictions: Successful completion of all didactic and clinical courses in periodontology in the first two years of the postgraduate program in periodontology. Enrollment restricted to 3rd year students in the postgraduate program in periodontology  

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  

In this required 2 quarter didactic course for third year postgraduate students in the postgraduate program in periodontology, students learn about the principles of starting a periodontal practice including legal, financial, and regulatory issues.  

**School:** Dentistry  
**Department:** Orofacial Sciences  
May the student choose the instructor for this course? No  
Does enrollment in this course require instructor approval? No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
Is this a web-based online course? Yes  
Is this an Interprofessional Education (IPE) course? Yes  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

**PERIODONT 432 Periodontology Literature Review (2 Units) Fall, Winter, Spring**  
*Instructor(s):* Gary C Armitage  
*Prerequisite(s):* None.  

Restrictions: Course only open to postgraduate students enrolled in the first or second year of the postgraduate program in Periodontology, School of Dentistry.  

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  

Postgraduate students act as discussion group leaders for 60 assigned topics over 2 years (6 terms). Course has total of 12 units (3 hours a week; 30 hours/2 units per quarter). With faculty mentor guidance, students review the literature, develop a seminar outline/objectives, and lead group discussions. Emphasis is placed on developing the skills necessary for critical analysis of periodontal and associated biomedical literature.  

**School:** Dentistry  
**Department:** Orofacial Sciences  
May the student choose the instructor for this course? No

**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
Is this a web-based online course? Yes  
Is this an Interprofessional Education (IPE) course? Yes  
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? Yes  
Repeat course for credit? Yes
PERIODONT 433 Implant Treatment Planning and Surgery (1 Units) Fall, Winter, Spring, Summer
Instructor(s): Guo-Hao Lin
Prerequisite(s): PERIODONT 423

Restrictions: Enrollment in the 3rd year of the postgraduate periodontology program
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This didactic year long course covers treatment planning and clinical care approaches for implants. Special emphasis is given to diagnosis, prognosis, etiology, treatment planning options and treatment rendered for complicated cases. Emphasis and expectations shift each quarter as student advances in demonstration of knowledge and skill. Students are expected to present and defend their treatment plan and therapeutic procedures based on relevant literature and clinical experience.

PERIODONT 439.01 Advanced Clinical Implantology (6 Units) Summer
Instructor(s): Guo-Hao Lin
Prerequisite(s): PERIO 429.04

Restrictions: Enrollment in the third year of the postgraduate periodontology program.
Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This clinic experience provides advanced training to students in providing clinic care to patients requiring dental implant surgical treatments. Students are expected to apply their knowledge of diagnostic modalities, surgical procedures, and strategies to perform surgical procedures including soft tissue and hard tissue deficiencies and multiple/full-mouth implant placement. Emphasis and expectations shift each quarter as student advances.
