PATIENT-CENTERED CARE (PT CN CARE)

PT CN CARE 101C  Community Clinics Externship Course  (8 Units)  Fall, Winter, Spring, Summer
Instructor(s): Michael M Okuji
Prerequisite(s): PCC 130

Restrictions: 4th year dental student

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

This course provides students an opportunity to advance their clinical practice ability while engaging an important group of patients in a community clinic. Students will be integrated into an oral health care delivery team in an underserved community, providing primary dental care to a diverse patient pool, including individuals who are healthy and sick, young and old.

School: Dentistry
Department: Preventive And Restorative Dental Sciences
May the student choose the instructor for this course? No
Does enrollment in this course require instructor approval? No
Course Grading Convention: P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory), In Progress (IP, SP/UP) grading allowed
Graduate Division course: No
Is this a web-based online course? No
Is this an Interprofessional Education (IPE) course? No
May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course? No

In this course, students will apply the knowledge and skills gained in didactic and simulation courses to provide supervised direct patient care in the diagnosis, treatment planning, and provision of fixed prosthodontic care as part of the patient's overall comprehensive dental care. This includes onlays, crowns, bridges, and implant restorations.

PT CN CARE 102CD Clinical Fixed Prosthodontics and Implants II (1 Units) Fall, Winter, Spring, Summer

Instructor(s): Natalie B Hastings, Rishabh P Acharya
Prerequisite(s): none

Restrictions: D4 or ID4

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this course, students will continue to apply the knowledge and skills gained in didactic, simulation, and early clinical courses to provide supervised direct patient care in the diagnosis, treatment planning, and provision of fixed prosthodontic care as part of the patient's overall comprehensive dental care. This includes onlays, crowns, bridges, and implant restorations.

PT CN CARE 103A Clinical Orthodontic Rotation (1 Units) Fall, Summer

Instructor(s): Snehlata Oberoi
Prerequisite(s): none

Restrictions: DDS 3rd year student

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this course, you will learn why patients seek orthodontic treatment, how to identify malocclusions, how to work up a patient for orthodontic treatment, basic treatment modalities, when to refer, and how orthodontics interfaces with general dentistry, as well as dental and medical specialties.

School: Dentistry
Department: Orofacial Sciences

PT CN CARE 105AB Clinical Pediatric Dentistry Rotation I (2 Units) Winter, Spring
Instructor(s): Ling Zhan, Ray E Stewart
Prerequisite(s): none

Restrictions: Restricted to IDP and DDS 3rd year students.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Program, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this third-year course, students will take patient histories, determine if there is a need to modify treatment based on medical or behavioral history, formulate treatment plans, and perform basic dental treatment for pediatric patients including oral evaluations, dental prophylaxis, sealants, and restorative care. Some students may also perform pulpal therapy, extractions, or space maintenance.

PT CN CARE 105CD Clinical Pediatric Dentistry Rotation II (2 Units) Fall, Summer
Instructor(s): Ling Zhan, Ray E Stewart
Prerequisite(s): PCC 136AB

Restrictions: IDP and DDS 4th year students

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Program, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this course, students will take patient histories, determine if there is a need to modify treatment based on medical or behavioral history, formulate treatment plans, and perform basic dental treatment for pediatric patients including oral evaluations, dental prophylaxis, sealants, and restorative care. Some students may also perform pulpal therapy, extractions, or space maintenance. Students will also observe complex pediatric dental care for infants and behaviorally challenged children.

PT CN CARE 106AD Clinical Oral Medicine Rotation (1.5 Units) Fall, Winter, Spring, Summer

Instructor(s): Caroline Helene Shiboski, Kyle B Jones, Sivappiriyai Veluppillai, Ava J Wu, Alessandro Villa
Prerequisite(s): none

Restrictions: Third year dental students and fourth year IDP dental students.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Students shadow oral medicine faculty/residents/attendees to become familiar with the most common oral conditions, participating in patient intakes and workups and establishing differential diagnoses, working alongside postgraduate residents in Oral Medicine. They participate in various tests and procedures including clinical testing of microbial cultures, exfoliative cytology, and soft tissue biopsies.

PT CN CARE 109A Clinical Oral Surgery Rotation I (2.5 Units) Fall, Winter, Spring, Summer
Instructor(s): Jennifer D Perkins
Prerequisite(s): none

Restrictions: Third year DDS student.

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

A well-rounded general dentist has strong abilities to evaluate a patient's medical risk for elective and urgent dental care and identify higher-risk patients who require hospital based dental care or special needs. In this course, students participate in various clinical experiences to augment their understanding of hospital dentistry.

School: Dentistry
Department: Oral And Maxillofacial Surgery

PT CN CARE 109CD Clinical Oral Surgery Rotation II (4.5 Units) Fall, Winter, Spring, Summer
Instructor(s): Jennifer D Perkins
Prerequisite(s): PCC 109A or 109B

Restrictions: fourth year dental students

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Building upon the foundation of knowledge and skills attained in PCC 109A, students will perform basic oral surgical procedures within the scope of a general dentist, and identify when to refer patients for specialty care. This course will also reinforce patient evaluation, medical risk assessment, diagnosis, treatment planning, and local anesthesia technique.

School: Dentistry
Department: Oral And Maxillofacial Surgery

PT CN CARE 111 Principles of Interprofessional Practice I (0.5 Units) Fall, Winter, Spring
Instructor(s): Jennifer D Perkins
Prerequisite(s): none

Restrictions: D1

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Contemporary health care involves teams to provide care to patients with a multitude of complex and chronic medical conditions. This course provides students an opportunity to learn about the roles of various members of the health care team, and how to effectively work in teams with members from other health professions. Specifically, this course includes the first three modules of the Core Principles of Interprofessional Practice for D1 students.

PT CN CARE 117 Introduction to Comprehensive Care I (2 Units) Fall
Instructor(s): Gwen Essex
Prerequisite(s): none

Restrictions: D1 DDS Student

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

In this course, you will learn about infection control, history-taking, prescribing and interpreting radiographs, and developing rapport with your patients. Your learning in this course will be centered on developing the self-reflection skills necessary to practice a changing art and science through regular reflective assignments. These are critical foundational skills upon which students will build in the subsequent courses in the patient-centered care stream.

PT CN CARE 118 Introduction to Comprehensive Care II (2.5 Units) Winter
Instructor(s): Gwen Essex
Prerequisite(s): none

Restrictions: D1 DDS Student

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

Now that you have learned the basics of creating a safe, professional working environment you will build upon your skills by conducting various patient assessments. With a strong focus on prevention, you will perform an assessment of a classmate-patient's oral hygiene, caries risk, and gingival condition, and create an individualized home care regimen. This course will also continue to guide the development of self-reflection necessary to maintain skills throughout practice.

Instructor(s): Gwen Essex
Prerequisite(s): none

Restrictions: D1

Activities: Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion

The final course in the first-year PCC course provides further experience with electronic health records and tracking patient attainment of suggested self-care skills. Assessments learned prior will be employed in collaboration with an upperclassperson during assisting experiences with clinic patients. Students will also be asked to conduct a self-reflection exercise about their experiences and learning during the 1st year of dental school.

PT CN CARE 131  Foundations in General Dentistry I (4.5 Units)  Summer  
*Instructor(s):* Melissa Anderson-Lin, Jennifer D Perkins, Ana I Casal  
*Prerequisite(s):* None  

**Restrictions:** D3 and ID3 students  

**Activities:** Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  

In this course, you will continue to build upon foundations of knowledge directly related to the delivery of patient care. You will review core knowledge and learn more advanced concepts in diagnosing, treatment planning, the steps for clinical care, and managing complications in general dentistry, oral and maxillofacial surgery, endodontics, and pediatric dentistry.  

**School:** Dentistry  
**Department:** Preventive And Restorative Dental Sciences  
**May the student choose the instructor for this course?** No  
**Does enrollment in this course require instructor approval?** No  
**Course Grading Convention:** P/NP (Pass/Not Pass) or S/U (Satisfactory/Unsatisfactory)  
**Graduate Division course:** No  
**Is this a web-based online course?** No  
**Is this an Interprofessional Education (IPE) course?** No  
**May students in the Graduate Division (i.e. pursuing Master or PhD) enroll in this course?** No  

PT CN CARE 132  Foundations in General Dentistry II (4.5 Units)  Fall  
*Instructor(s):* Melissa Anderson-Lin, Fritz Finzen, Yogalakshmi Rajendran, Ram M Vaderhobli, Ray E Stewart, Mark A. Dellinges, Ana I Casal  
*Prerequisite(s):* none  

**Restrictions:** D3 and ID3  

**Activities:** Lecture, Seminar, Clinical, Fieldwork, Independent Study, Project, Web work, Workshop, Practical Experience, Special Projects, Lab skills, Lab science, Conference, Discussion  

This is the second in a four-course third-year didactic series. In this course, you will continue to review core knowledge and learn more advanced concepts in diagnosing, treatment planning, the steps for clinical care, and managing complications in periodontics, removable and fixed prosthetics, general dentistry, and pediatric dentistry. Additionally, you will continue to build upon your framework for managing difficult patients utilizing techniques from the behavioral sciences.
