BIOMEDICAL IMAGING (MS)

Visit program website. (https://radiology.ucsf.edu/education/graduate-programs/msbi-program/)

Degree Offered: MS
Program Leadership:
Alastair Martin, PhD, Program Director
Susan Noworolski, PhD, Director of Graduate Studies
Admissions Inquiries:
Mike Leon, Program Administrator

Program Description
The Master of Science in Biomedical Imaging (MSBI) program is intended for students with bachelor’s degrees, advanced pre-doctoral students, postdoctoral fellows, residents, researchers and faculty members who wish to master biomedical imaging and research methods to enhance their research designs and broaden their investigative projects.

The UCSF MSBI Program is one of the first of its kind in the United States. It is unique in terms of the breadth and depth of subject matter conveyed over a relatively short period of time. MSBI graduates may matriculate through the program in either three or four 10-week academic quarters.

Faculty
The MSBI Faculty comprises 13 assistant, associate and full professors who are part of the UCSF Department of Radiology and Biomedical Imaging. In addition, throughout any academic quarter, several guest lecturers from the department, as well as from other departments at UCSF are invited to offer lectures and share expertise in any core course or elective.

Research Areas
• Cancer imaging
• Neurological imaging
• Musculoskeletal imaging
• Abdominal/pelvic imaging
• Nuclear-optical imaging
• Image processing and analysis
• Imaging study design
• Diagnostic and therapeutic ultrasound
• Radiopharmaceutical probes
• MR pulse sequence development

Career Outcomes
Graduates of the MSBI program have continued on a variety of paths since graduation. These include: medical school, doctoral programs, internships and employment in academic labs, as well as internships and employment in industry.

The MSBI program office is located at the UCSF China Basin campus, where the majority of the MSBI program lectures and labs are also convened. Some labs are convened offsite (e.g., at UCSF Mission Bay Campus and the Veterans’ Administration Medical Center in San Francisco).

The Biomedical Imaging MS program is offered by the UCSF Graduate Division. The program is administered by the UCSF Department of Radiology and Biomedical Imaging and delivered by faculty members in the Department of Radiology and Biomedical Imaging.

Admission Requirements
• Undergraduate degree in basic sciences or engineering
• Statement of research experience (1 page limit)
• Statement of Purpose (1 page limit)
• Two letters of recommendation
• English proficiency metric (i.e. TOEFL/IELTS) for foreign applicants
• Description of education in mathematics and computer science (1 page limit) - recommended

Learning Outcomes
• Knowledge about the fundamentals of medical image formation and analyses
• Hands-on experience with imaging equipment and analyses
• Knowledge about applications of medical imaging to characterize pathologies, to monitor response to therapies and to assess underlying biology

Additional Information
Program Faculty
• Find a program faculty list (https://radiology.ucsf.edu/education/graduate-programs/msbi-program/people/) on the program website.

Career Outcomes
• Find career outcomes and other data on master’s programs (https://graduate.ucsf.edu/bioimaging-statistics/) on the Graduate Division website.

Degree Requirements
• Minimum GPA of 3.0
• Minimum of 36 units
• All core courses and required activities taken and passed
• Pass comprehensive examination or completion and submission of a master’s thesis (students should consult with their program for specific requirements).
• For additional details, please see: graduate.ucsf.edu/masters-degree (https://graduate.ucsf.edu/masters-degree/)

Core Courses
